

WASTE MANAGEMENT BY UNIJA NOVA

Presented by Valentina Keblar,
Director of General Affairs at Unija Nova Ltd.

UNIJA NOVA

For all services in handling packaging waste and reverse logistics, Unija Nova has reliable, competent and fair team. We provide our service throughout whole Croatia. By doing our business we managed to save more than 500.000 tonnes of waste from landfills.

This is how we do it...

UNIJA NOVA – MISSION

Our mission is to provide our customers with excellent service while respecting the principle of preserving the environment and improving the quality of living environment.

UNIJA NOVA – VISION

Our vision is to be leader in quality and competent waste management, write-off goods and materials unsuitable for consumption and sale on the Croatian market.

HALF A CENTURY WITH YOU

1961

Unija Nova was founded, the first company for collecting waste glass and processing broken glass. On the whole territory of the former Yugoslavia, only industrially produced glass packaging was being collected.

1985

The first containers for separate collection of glass in public areas intended for the citizens were set up in Zagreb.

2002

The new facility with larger capacity was constructed and adapted for processing of several types of packaging waste (glass, PET, metal), as well as all types of waste glass (flat/window glass, car glass, safety glass, wire glass, hospital glassware, laboratory glassware, etc.) Own specialised software was developed for more efficient monitoring of container unloading system.

2004

Implementation of the quality control system began according to the standard ISO 9001:2008 and environmental management standard ISO 14001:2004.

2007

In the last five years the quantity of recycled glass has quadrupled, and the collection capacities have increased five times. The number of employees has increased four times, and business activity has expanded to the collection, transport, storage, processing and recycling of other types of non-hazardous waste.

HALF A CENTURY WITH YOU

2010

The business centre for Slavonija in Beketinci, Municipality of Čepin, was successfully completed and opened.

2011

Operation with goods unsuitable for further use from commercial and service activities was introduced.

2012

The existing waste management capacities were expanded - to the total of 68,000 m².

2013

The new logistic collection centres were opened in Sesvetski Kraljevec, Beketinci, Poreč, Šibenik and Dugopolje. We started handling Category 3 former food and waste edible oils.

UNIPA NOVA – TODAY

- Recycling plant specialized for recycling all types of glass and plant for waste management (total capacity of 80.000 t/yr)
- Plant for managing all types of waste packages and materials not intended for sale and/or consumption.
- Total of 68.000 m² for waste managing on three locations in Sesevetski Kraljevec and 4.500 m² on location in Slavonia.
- Five regional centres for animal by-products and derived products not intended for human consumption (EC 1069/2009) in Zagreb, Beketinci, Poreč, Dugopolje and Šibenik, with two storage facilities cooled at 4°C.
- Specialized vehicles, containers, and software for waste management.
- Company is empowered by Government's authorities for waste management
- Company is certificated for recycling of non-toxic waste according to Quality Management System EN ISO 9001:2008, Environment Management System EN ISO 14001:2004 and Occupational Health and Safety Management BS OHSAS 18001:2007.

REVERSE LOGISTICS

The life cycle of a product often does not end with its purchase and consumption. It may happen that the products get withdrawn from sale due to expiration date, damaged packaging, obsolescence. Such situations may lead to unplanned expenses, problems with storage or transport, or to violation of regulations and procedures, even to customer disappointment and loss of market share. Caring for the environment starts at home! By separating waste in your own home, and at work, reduce the quantity of mixed waste and increase the recyclable waste. For any advice on how to dispose of your household waste as simply and as efficiently as possible, please contact us with confidence. By proper waste separation, your household can help to keep the environment more clean, and your company can improve its business results.

SPECIALIZED EQUIPEMENT

We are preventing this by using...

specialized containers and specialized vehicles authorized for waste transport

CONTROL

In agreed weekly periods goods that are not suitable for consumption are taken from the client's branches, together with the accompanying documents (accompanying sheets, write-off lists, etc.).
